This promotion will comprise of a trade and golf workshop taking place in Copenhagen. NEW for 2019 is the golf workshop extension, which is an integrated part of the trade event, but with its own designated area within the workshop room. This will allow for cross-over where operators with interest in both can mingle and make appointments with industry selling general tourism products as well as golf. Taking part in the event is an excellent opportunity for our industry partners to promote their product to key trade from all over the Nordic region, and to take advantage of the great direct flight access into the region. The trade event will comprise of two workshop sessions with a break and a networking lunch served in between.

Tourism Ireland Nordics will bring in key trade including selected golf operators to the event from all across the Nordics, providing you with an efficient meeting opportunity to do business. It will be a full day workshop event (09.00-16.30) made up of two sessions with lunch in between. The event area consists of a larger room for the workshop, a golf workshop area and a smaller room for breakout information sessions hosted by Tourism Ireland. For the workshop, the partners will be allocated a desk with a name sign. All partners will have access to the hospitality area with complimentary drinks and snacks served morning and afternoon, as well as a sit-down lunch.
